EVOLVEDTECHNOLOGY

→ *top vandal-proof*
→ *maximum accessibility*
→ *innovative performances*

HERO, the innovative vandal-proof door panel offers **the top in terms of technological performance and security**, using top-level materials and finishes, offering excellent solutions for **big complexes**, in line with regulations regarding **accessibility** for disabled people.

Hero is a combination of **vandal-proofing**, the best ergonomics and the top of performances. By touching it you can feel robustness and elegance at the same time. It is cold, modern and reliable: **Hero will charm you.**

TD2000HE
Size: mm 205x500x2
Video outdoor station, equipped with a wide-angle camera, 14 keys, system-status icons and graphic display. It is possible to add a proximity reader. In terms of accessibility for disabled people, it has many characteristics to offer, including speech synthesis.

characteristics

→ **size**: 205 x 500 mm. Depth of the in-wall box (included): 61 mm. Thickness of the plate 2 mm

→ **material**: 316L stainless steel plate and keys (marine grade steel), lexan cover glasses, for the maximum of robustness and resistance

→ **Torx** security screws (6)

⸙ Bluetooth™

→ **flush**-mounting

DUO SYSTEM

→ designed for **DUO system with bus power supply**

→ **digital keyboard** made up of 14 stainless steel keys:
> squared, 25mm wide each
> backlighted with white light
> the outline of the keys is backlighted with a yellow light, for a better identification by visually impaired users
> each key is equipped with Braille
> 10 keys to enter a code
> 2 search keys
> send call key
> delete key

→ wide **graphic display, backlighted** with white light, for a better reading in case of low-light conditions

→ **backlighted status-icons**, to immediately understand the system or ongoing call status:
> ongoing call
> active conversation
> open door
> busy system or nonexistent code

→ **speech synthesis** for audio indication about call or system status (available in several languages, it can de disabled by programming)

→ **wide-angle camera** that allows a correct view of every user's category, for more security

→ 2 independents outputs, 1 x electric lock (13Vac, 1A), 1 with a relay for automatic gate or other lock types. It can control up to 4 remote relays
→ Mechanical set up for any **proximity reader** mounting. By integrating XE2922, the access control can be associated to time slots

→ serial integration of inductive loops for pairing with **hearing aids for hearing impaired**

→ up to 500 users and their personal passwords can be stored in the outdoor station

→ it can be programmed via Bluetooth, with the Duo System app for iOS and Android (XE2922 is integrated) or by using the digital keyboard of the device

→ thanks to the integration to XE2922 that can be installed, Hero is compatible with **Farfisa Smart Access** and **Farfisa Smart Dial** applications, for a contactless management of the accesses.

**NO TOUCH.
NO COVID 19.**
